DOCUMENT DELIVERY SERVICES TO INDIVIDUALS

The National Agricultural Library (NAL) has a unique responsibility to supply copies of agricultural materials not found elsewhere.

Filling requests for materials readily available from other sources would divert NAL's resources and diminish its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL should be viewed as a library of last resort and individuals should submit requests first to local or state sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. Individuals in other countries should submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, the requests may be submitted to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's DOCUMENT DELIVERY SERVICE INFORMATION FOR THE LIBRARY

The following information is provided to assist your librarian in obtaining the required materials.

LOAN SERVICE – Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans should be made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

DOCUMENT DELIVERY SERVICE – Photocopies of articles are available for a fee. Requests must be made through local public, academic, or special libraries. The library should submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture*, or the NAL Catalog) and the call number is given, that call number should be listed in the proper block on the request form. Willingness to pay charges must be indicated on the form. Compliance with copyright law or a statement that the article is for "research purposes only" must be included on the interlibrary loan form. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche – $5.00 for the first 10 pages or fraction copied from a single article or publication. $3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm – $10.00 per reel.
- Duplication of NAL-owned microfiche – $ 5.00 for the first fiche and $ .50 for each additional fiche per title.

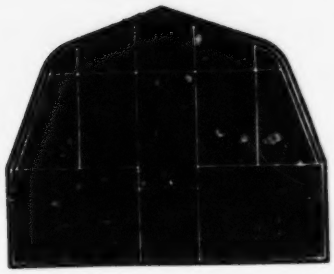
Billing – Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Requesters are encouraged to establish deposit accounts with NTIS. *DO NOT SEND PREPAYMENT.*

Send Requests to:

USDA, National Agricultural Library
Lending Branch, ILL, 6th Floor
Beltsville, Maryland 20705-2351

Questions concerning these services may be made by correspondence to Head, Lending Branch or by telephone (301) 344-3755.

GREENHOUSE GROWING



The popularity of gardening is revealed by the 1988 National Gardening Survey taken by the Gallup Organization. According to the survey, 69 million American households engage in various gardening activities. It is not surprising, therefore, that homeowners grow plants in greenhouses. Experts' estimates of the number of United States hobby greenhouses range from 700,000 to 2 million! The lack of a more precise figure is due to the difficulty of defining the term hobby greenhouse. Many use the term to include sunrooms, solariums and garden rooms.

Greenhouses are available in a variety of sizes, types and styles with various glazing and framing materials. They can be freestanding or attached to a house and may be used year-round or seasonally depending on how they are equipped. Some greenhouses must be installed professionally. Others are easily assembled by a handy do-it-yourselfer. Whatever type and style of greenhouse is chosen, the purpose is the same – to provide an optimum growing environment for plants.

Since there are not many current books on greenhouse growing, the decision was made to include all relevant books. Consequently, this bibliography contains some books which are out-of-print and no longer available for purchase. Your local library may own some of these out-of-print works.

HOBBY GREENHOUSE BOOKS

Abraham, George. *Organic Gardening Under Glass*. Emmaus, PA: Rodale Press, 1975. (ISBN 0-87857-104-3). NAL Call No.: SB415.A27
